

Escape VMware

Migrate to Platform9 Private Cloud Director with minimal disruption or changes to your existing infrastructure—retain familiar workflows, tools, and staff.

Private Cloud Director overview

Turn existing infrastructure into a full-featured private cloud. Manage VMs and containers with familiar GUI tools and automated APIs in a private, secure environment you control.

Familiar VM operations

All the enterprise VM platform features you expect. Familiar GUI-based interface for traditional VM management.

Protect storage investment

Integrate seamlessly with the enterprise storage you already own—no need to rip and replace like hyperconverged solutions.

Automate VMware migration

Migrate thousands of VMs in weeks with our free tool [vJailbreak](#) and cut costs by up to 90%.

Fortune 500 global enterprise migrating 40,000 VMs from VMware to Platform9 Private Cloud Director

- Migration of 40,000 VMs across 3000 hosts using vJailbreak.
- Replacement for VMware features: DRS, vMotion, VM-HA, NSX, self-service.
- Integration with Tintri storage—no new investment needed.

"We've looked at every solution on the market, and Platform9 is the only solution that meets all of our requirements." - A Fortune 500 enterprise

Join our hands-on lab

Join our monthly workshop and get hands-on experience with Private Cloud Director. Let our specialists guide you through an interactive session showcasing real-world scenarios.

Top 5 enterprise features

1. VM High Availability (HA)

Automatically restarts VMs after host failures

2. Live migration

Move VMs between hosts without downtime

3. Dynamic Resource Rebalancing (DRR)

Continuously optimizes workload placement based on real-time cluster utilization.

4. Software Defined Networking (SDN)

Built-in overlay networks, routers, NAT, load balancers, and firewall rules.

5. Operational security

Role-based access, tenant isolation, encrypted communication, and audit logging.

Migrate Your VMs automatically

Migrate your entire VMware environment to Private Cloud Director with minimal downtime using vJailbreak.

Easy-to-use GUI

Clean, intuitive interface—no command-line skills needed. Makes VMware migration simple and accessible.

In-place migration

Automate everything or customize the process to fit your needs. Migrate in-place all of your workloads on the same hardware or environment. Real-time tracking keeps you in control.

Community-driven

Fully transparent on GitHub—no black-box code, no hidden costs. Built for and by the community.

Learn why Platform9 is the best VMware alternative

One platform to manage VMs and containers with all virtualization features you rely on, fully integrated with your existing tools.
