

Platform9 Enterprise Pilot Program

Package Overview

The Enterprise POC from Platform9 will help you get up and running with your managed cloud infrastructure quickly and easily. Our goal is to apply best practices from our most successful customers to increase speed to value for your organization. The Enterprise POC was developed to give customers a cloud “quick start” button. Included is an unprecedented speed to value, a fully managed experience, professional cloud training as well as a year of service to get the most out of your investment.

The Enterprise Pilot is a predefined agreement that includes software licenses and training by a Platform9 systems engineer. A typical engagement takes under an hour for setup followed by three (3) days of training focused on using your hybrid cloud.

Package Details

- License allocation: 40 licenses
- One year of managed Open Stack & Kubernetes
